Summary

I have worked for over 5 years in the web industry, both on my own as a freelancer, and as a part of a multi-national company. I have professional experience working in .NET and Ruby on Rails stacks, but I am most comfortable/proficient working in the front-end. I am highly proficient in HTML5, CSS, JavaScript (ES5 & ES6), CoffeeScript, Sass, and Jade. I have worked professionally with React and Angular.js. I am looking to join a small, fast-paced company as a front-end web developer.

Highlights

- HTML
- CSS3
- JavaScript
- ES5 & ES6
- Ruby on Rails
- .NET
- Git

- React
- Angular.JS
- Sass
- Jade
- CoffeeScript
- C#
